Tools: NPM, Yarn, Webpack, Babel, ESLint, Prettier

Education

Higher Secondary Certificate

April 2014 – July 2016 | GPA – 4.25

Rajbari Govt. College, Rajbari

Computer Science & Engineering

January 2017 – June 2022 | CGPA – 3.22

University of Rajshahi, Rajshahi

Experience

Bizzntek Ltd. | Software Engineer Intern

July 2022 – September 2022 | On-site | Uttara, Dhaka

Bizzntek Ltd. | Associate Software Engineer

October 2022 – March 2024 | On-site | Uttara, Dhaka

Bizzntek Ltd. | Software Engineer

April 2024 – Current | On-site | Uttara, Dhaka

Projects (Work)

Xenter Wireframe

Objective: Wireframe project for Medical Solution

Client: Xenter MD, USA

Role: Frontend Developer

Skills: HTML, CSS, JavaScript, jQuery, Bootstrap, Chart.js, Video.js, Signature Pad

Details: This was a design project for the solution project. In this project we designed the whole application layout, all required pages, all forms and other necessary components as required. The solution project was dependent on it. So, we had to make client satisfied to get the solution project.

Xenter Solution

Objective: Medical Solution

Client: Xenter MD, USA

Role: Frontend Developer (React)

Skills: HTML, CSS, JavaScript, Bootstrap, React, Redux, Saga, Chart.js, Video.js, Signature Pad, Reactstrap, Video.js, Chart.js, Signature Pad, Formik, Axios, Rest API, Swagger

Details: This was a medical solution project. In this project we converted the whole wireframe into a dynamic website. We used MongoDB as database. In this application there are three types of member. Doctor, Nurse, Management. Different role have access to different types of features. We worked as per client's requirement.

Point of Sale (POS)

Objective: Sales & Inventory Management

Client: In House Product

Role: Frontend Developer (React)

Skills: HTML, CSS, Typescript, Bootstrap, React, Redux, Saga, Chart.js, Video.js, Signature Pad, Reactstrap, Chart.js, Formik, Axios, Rest API, Swagger

Details: This is first in-house of Bizzntek Ltd. This is an inventory and sales management software. Where an admin can add inventories, make menu, set price and whatever is required in a shop or restaurant. On the other hand, the sale counters can select items calculate price, generate receipt and take orders from customers.

Member Portal

Objective: Microfinance User Portal

Client: Grameen Communications, BD

Role: Frontend Developer (React)

Skills: HTML, CSS, Typescript, Bootstrap, React, Redux, Saga, Ant Design, Axios, Rest API, Swagger

Details: This is a self-registration member portal for microfinance users. Microfinance users can create account in this application. After account approval he/she can apply for loan or savings with required documents. After approval of loan or savings they can continue their installments. Along with these there are so many features.

Case Management

Objective: Support Ticket Management

Client: Grameen Communications, BD

Role: Frontend Developer (React)

Skills: HTML, CSS, Typescript, Bootstrap, React, Redux, Saga, Material UI, Axios, Rest API, Swagger

Details: In this project we developed a support portal where customers can create ticket with their complain and help requirements. Admins resolve the issue or helps the customer then close the ticket. This is a support application for all of Grameen Communications Microfinance customers.

LoadMiles

Objective: Trucking System Management

Client: Loadmiles Inc, USA

Role: Full Stack Developer (FE heavy)

Skills: HTML, CSS, Typescript, Bootstrap, Angular, Node JS, Express JS, Rest API, Swagger, BitBucket, Jira, CircleCI

Details: In this project we developed a System for managing trucking service. With this application a user can request for a pickup. Available truck drivers can accept the request and contact for transport. While transporting driver can update each steps of loading-unloading. This application is a very large scale application for trucking industry.
